

OWAIS AHMAD Backend Developer

Contact Information:

Email: owaisa45683@gmail.com

Phone: +923358299019

I am a highly skilled Full Stack Web Developer with **4+ years of experience**, specializing in **backend development** with a strong focus on **Node.js, NestJS, and Microservices**. My expertise lies in designing **scalable, high-performance** web applications across **real estate, CRM, robotics, e-commerce, and logistics** domains.

Currently, I work as a **Mid-Level Node.js Developer at Consultancy Outfit**, where I develop **CRM systems** using **Microservices, Docker, Cloud Servers, and REST APIs**. My role involves **building scalable backend solutions, optimizing API performance, and ensuring seamless integration of microservices**.

With a **Bachelor's degree in Software Engineering**, I have successfully led and contributed to **various projects**, including **real-time applications, live streaming platforms, booking systems, and inventory management solutions**. I am passionate about writing **clean, secure, and efficient code**, collaborating in **agile environments**, mentoring junior developers, and staying up-to-date with the latest industry trends.

QUALIFICATIONS

- BS Hons in Software Engineering, University of Haripur, 2020

EXPERIENCE

Mid-Level Node.js Developer, Consultancy Outfit

October 2024 - Present

- Developing and maintaining CRM systems using NestJS, Microservices, and REST APIs.
- Managing and deploying services on Docker and Cloud Servers for scalability.
- Implementing secure and optimized APIs to enhance system performance.
- Working on enterprise-level applications, ensuring high availability and fault tolerance.

Node.js Developer, Zamtech Solutions

Working Remotely

- Specializing in real estate projects using Node.js, Express, MongoDB, and Socket.IO.
- Developed live streaming capabilities and real-time chat applications.
- Implemented RESTful APIs for efficient data handling and integration.
- Engaged in managing and scaling applications on AWS.

Backend Developer, Robotics-World

March 2021 , October-2024

- Proficient in backend development with a focus on Node.js, leveraging its asynchronous event-driven capabilities.
- Designed, developed, and maintained server-side architectures using Node.js. Implemented APIs and integrated them within Node.js applications for seamless communication.
- Managed database systems with MongoDB and MySQL, optimizing schemas for various applications.

Shared Hosting Project Deployment Experience

1

- Proficient in deploying web applications on shared hosting platforms.
- Managed and configured shared hosting services, including domain setup and server resource management.
- Utilized control panels like cPanel for managing projects.

Teaching Experience

- NAVTTC Kamyab Jawan Batches (CIT Course): Instructor for web development courses.
- Visiting Faculty, Pak Austria: 1 year of experience teaching Full Stack Web Development.
- Web Development Instructor, Modernage Public School and College Abbottabad: Teaching web development principles and practices.

Management and Project Lead

- KPK IT board Project Lead for Interns
- NAVTTC Project Lead for Interns
- BNIP Project Lead for Interns
- Oversaw project management, task allocation, problem-solving, debugging, and code verification.

Web Developer (Kp Intern) Robotics-World March 2020 - August 2021

- Worked extensively with Angular, MongoDB, Node.js, and Express.
- Applied best practices for writing clean, secure, readable, and scalable code.
- Participated in meaningful and thorough code reviews.

Web Developer Intern Urmaan (Codematics) November 2020 - December 2020

- Gained experience in HTML/HTML5, CSS, Bootstrap, JavaScript, WordPress.

Projects:

Real Estate Project (Zamtech Solutions): Developed a comprehensive real estate platform using Node.js, Express, MongoDB, and Socket.IO for real time updates and interactions.

CRM System (Consultancy Outfit): Developing a CRM platform using NestJS, Microservices, Docker, and Cloud Servers.

Live Streaming and Chat Application (Zamtech Solutions): Implemented live streaming capabilities and a real-time chat system to enhance user engagement.

Booking System: A multi-company booking platform allowing businesses to manage reservations and availability, using Node.js, Express, and MongoDB.

Inventory Management System: Developed a system to manage inventory levels, orders, and product information across various companies.

Logistic App (Currently Working): A web and app-based system similar to courier services, using Node.js, Express, Angular 14, and MongoDB.

2

Lucky Draw: A platform with various user product categories, participation options, and product management, using Node.js, MongoDB, HTML, CSS, JavaScript, and Angular Material.

Kids Collections: An E-commerce API managing products, orders, and user profiles, using Node.js, Angular, Express, and MongoDB.

Party Land: A web app for displaying and purchasing birthday and event related products, using Node.js, Express, MongoDB, and Angular.

Skills:

- NodeJs
- Express
- Mongodb
- Angular
- NestJS
- Mysql
- RestApi
- Microservices
- Docker
- Test-Driven Development
- Application Architecture
- Version Control (e.g., Git)
- Deployment and Hosting
- Problem-Solving
- Collaboration and Communication
- Continuous Learning
